Resume-to-Job Match Report

Candidate Name: ALEX MORGAN

Target Position: Data Science Intern

Overall Match Score: 71.92%

Score Breakdown

- Education Score: 100.0%
- Skill Score: 78.8%
- Project Score: 70.0%
- Experience Score: 54.55%
- Keyword Score: 52.0%

Skills Analysis

Matching Required Skills

- Python programming
- Pandas
- NumPy
- SQL
- Machine learning concepts
- Data cleaning and preprocessing
- Exploratory data analysis (EDA)
- Data visualization
- Matplotlib
- Git

- GitHub

Missing Required Skills

- Relational databases
- Seaborn

Matching Preferred Skills

- Experience with Scikit-learn
- Experience building machine learning models
- Experience with Streamlit
- Familiarity with Generative AI
- Academic or personal projects involving data analysis or machine learning

Missing Preferred Skills

- Knowledge of TensorFlow or PyTorch
- Knowledge of Power BI
- Experience with deep learning
- Experience working with large datasets

Strengths & Areas to Improve

Strengths

- Strong match in required skills: Python programming, Pandas, NumPy, SQL, Machine learning concepts, Data cleaning and preprocessing, Exploratory data analysis (EDA), Data visualization, Matplotlib, Git, GitHub.
- Matches preferred skills: Experience with Scikit-learn, Experience building machine learning models, Experience with Streamlit, Familiarity with Generative AI, Academic or personal projects involving data analysis or machine learning.
- Your education appears to satisfy the job's education requirements.

Areas to Improve

- Missing required skills: Relational databases, Seaborn.

- Missing preferred skills: Knowledge of TensorFlow or PyTorch, Knowledge of Power BI, Experience with deep learning, Experience working with large datasets.
- Your experience has some relevance but could be better aligned with the job requirements.
- Your projects are partially relevant to the position.
- Your resume is missing several important job keywords.

Recommendations

1. Consider gaining experience with the missing required skills before applying, if they are genuinely required for the position.
2. Highlight the experience that most closely matches the responsibilities in the job description.
3. Emphasize the parts of your projects that demonstrate skills required by the job.
4. Use relevant keywords from the job description when they accurately describe your existing skills and experience.
